

Profitable Food Manufacturing Business

\$1,295,000

This specialty food manufacturing business was established more than 65 years ago. It produces several different products which are distributed heavily throughout the Rocky Mountain region as well as the Western US. Most of its revenue comes from wholesale business and has well-established accounts with national grocery chains. The company also utilizes its own eCommerce website as well as Amazon.com to distribute products to consumers. The business is poised for growth by expanding the supply chain beyond the Rocky Mountain Region. We believe this would be an ideal acquisition for an established food manufacturing business that would like to expand its current product line or a marketing-oriented entrepreneur who would like to take the business to the next level.
